

# ROM SmartTrailer PRO

## HIGH PRESSURE SEWER JETTING TRAILER

It's here: The new SmartTrailer PRO sewer jetting trailer. Packed with smart solutions based on over 35 years of experience the Smart Trailer Pro is perfect for unblocking and cleaning of sewer lateral lines and main lines up to Ø400mm. Options include petrol or a diesel engine, a cleaning pressure of up to max. 200 bar and a water capacity of up to max. 60 l/min.

#### SPACIOUS 650 LITRE WATER TANK

With clever use of space and materials, the SmartTrailer PRO is compact, light weight and equipped with a spacious water tank of 650 litres. This way, you can continue your work activities longer.

#### STABLE ROAD HOLDING

The SmartTrailer PRO has a unique transit space in its water tank. Perfect for the storage of longer tools. Also, the transit space stabilises the water in the tank for safer road handling.

#### SMART TOOL BOXES

Always the right tools within reach thanks to the two extensive tool boxes. With integrated holders for storing nozzle cases and safety cones.

#### OPTIMAL OPERATING EASE

Thanks to the ergonomically located reels, electric start system, full operation is at the rear of the machine with a easy to reach emergency stop button.

#### USER FRIENDLY ELECTRICALLY DRIVEN HP REEL

The SmartTrailer PRO can be equipped with an electrically driven high pressure reel with hose guiding system. This allows for easier operation and is also very environment friendly.

#### SAFER TO OPERATE

Thanks to our unique design heat is dissipated through the grille and away from the operator thus making the operation safer and quieter.

#### EXTREMELY RIGID

The Scorpion skeleton provides optimum rigidity and strength. The base frame and chassis are hot dip galvanised and the chassis is from the high quality brand AL-KO.

#### COMPOSE YOUR OWN SMARTTRAILER PRO

The SmartTrailer PRO come with an exciting list of accessories. With various jetting pump options and additional options such as an electric HP reel, Remote control, a bonnet spray painted in your company colour, or a nozzle case. And if you opt for a diesel version with remote control, we provide you with our user and maintenance friendly iROM operation totally free of charge!

### ADVANTAGES

- Continue your work activities longer thanks to the spacious 650 litre water tank
- Work easily with the electrically driven HP reel (optional)
- Stable road holding thanks to unique transit in water tank
- Always the right tools within reach thanks to spacious tool boxes and integrated holders
- Unique thermal management that dissipates heat away from the operator thus making operation safer and quieter
- Rigid chassis thanks to the Scorpion skeleton and galvanised frame and chassis
- Ergonomic design
- Service and maintenance friendly

## TECHNICAL INFORMATION

### SUITABLE FOR

- Unblocking and cleaning of lines up to max Ø400mm
- Facade, surface, and drain cleaning and graffiti removal

### DRIVE

- Petrol or diesel
- Electric start system

### HIGH PRESSURE PUMP

- SPECK NPR25, 3 plunger high pressure pump
- Cleaning pressure up to max. 200 bar and a water capacity up to max. 60 l/min

### HIGH PRESSURE REEL

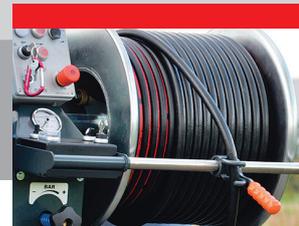

- Manually operated or electrically driven
- Robust, electrogalvanised high pressure reel
- Suitable for max. 80m ½" (ND13) sewer jetting hose

### PROTECTION

- Base frame / chassis is fully hot dip galvanised
- Scorpion skeleton, bumper and other bodywork: powder coated in RAL 7016 (anthracite grey)

### STANDARD FEATURES INCLUDE I.A.

- Spacious water tank (650 litres) and fuel tank (30 litres)
- 2 spacious tool boxes
- Polyester bonnet and toolbox covers supplied in gelcoat (RAL 9010 Pure white)
- Manually operated water filling hose reel with 50m. ¾" water hose (ND20)
- Double insulated stainless steel exhaust silencer
