

SmartTrailer

HIGH PRESSURE SEWER JETTING TRAILER

The ROM SmartTrailer is suitable for the unblocking and cleaning of sewer lateral lines and main lines up to Ø300mm. The machine can also be deployed for facade, surface, and drain cleaning and the trailer can even be used for light graffiti removal. The perfect solution for drain technicians, plumbers, Housing Associations and Local Authorities.

A COMPACT YET POWERFUL MACHINE

Our sewer jetter is proof that size really doesn't matter. With a cleaning pressure of up to max. 190 bar and a water capacity of up to max. 50l/min, the SmartTrailer is a force to be reckoned with.

EASY TO OPERATE

The SmartTrailer can easily be operated by anyone. The job will be done in no time at all.

SAFE DRIVING HABITS

A comfortable driving experience thanks to the trailer's low centre of gravity. This ensures both stable and safe road holding.

CAN BE USED BY ANYONE WITH A CAR LICENCE

Our machine's weight is so low it can be towed by any vehicle. Even with a full water tank, the total weight of the trailer remains below 750kg. Therefore, a trailer (or other specific) licence is not required and anyone can take it out to work giving you flexibility in terms of required personnel and vehicle fleet.

MAINTENANCE FRIENDLY

The ROM SmartTrailer is a maintenance friendly machine. Thanks to the combination of a B&S engine and a Speck high pressure pump, the unit requires little maintenance. The optional bonnet has a wide opening angle, which is ideal for servicing the engine/pump compartment.

EASY TO PARK

The SmartTrailer can be parked practically anywhere thanks to its compact design. Moreover, the trailer is so light weight that you can easily push it anywhere by yourself, even through the narrowest of streets.

TOP QUALITY FOR A LOW PRICE

Despite its low pricing, the machine is full of high quality parts; a Speck high pressure pump, a robust electro galvanised HP reel and a hot-dip galvanised frame.

OPERATE FROM A DISTANCE

Why not go for the optional remote control and work even more efficiently, ergonomically and safely. Making it possible to operate the machine by yourself and work from a greater distance. This option also includes an approved active emergency stop button.

ADVANTAGES

- **Versatile**
- **User friendly**
- **Light weight**
- **Perfect for lighter commercial vehicles**
- **Standard driving licence is sufficient**
- **Compact**
- **City centres and parking garages are easily accessible**
- **Can be parked practically anywhere**
- **Optimum performance in the harshest of circumstances**
- **Reliable industrial engine/pump combinations**
- **Maintenance friendly**
- **Hot-dip galvanised frame**
- **400 litre water tank**
- **Safe (CE mark)**

TECHNICAL INFORMATION

SUITABLE FOR

- Unblocking and cleaning of lines up to max Ø300mm
- Facade, surface, and drain cleaning and graffiti removal

DRIVE

- 4 stroke air-cooled petrol engine
- Optional manual start system or electric start system

HIGH PRESSURE PUMP

- SPECK NP25, three cylinder plunger pump
- Cleaning pressure up to max. 190 bar and a water capacity up to max. 50 l/min
- High pressure reel

MANUALLY OPERATED

- Robust, electro galvanised high pressure reel
- Suitable for max. 80m ½" (ND13) sewer jetting hose
- ROM maintenance-free bearing & external radial swivel joint

PROTECTION

- Hot-dip galvanised frame
- All other metal (plate) and parts electro galvanised

STANDARD FEATURES INCLUDE I.A.

- Fully integrated water tank (400 litres)
- High pressure sewer jetting hose 50 metres
- Toolbox (60l.) with stainless steel valve
- Several accessories, such as an infinitely adjustable pressure regulator, pressure gauge and water filter with automatic stop valve
